

CareWatch Business Model Canvas

Key Partners	Key Activities	Value Proposition	Customer Relationships	Customer Segments
- IoT sensors and wearable hardware suppliers providing cost-effective components for device manufacturing - Medical device certification bodies and healthcare regulators for product safety validation and compliance - Nursing homes, assisted living facilities, and elderly care NGOs for institutional distribution and outreach - Health insurance companies through device-subsidy partnerships to lower cost barriers for low and middle income households - Mobile platform providers like Google Play and App Store enabling consumer access to the CareWatch companion app	- Continuous refining fall-detection algorithms - Maintaining application and secure cloud backend - Managing inventory and distribution	- CareWatch keeps elderly safe and independent without invading privacy. - Caretakers can stay connected to your loved one's safety anytime, anywhere, no constant check-in calls needed. - Nursing homes and care centers can monitor all residents smarter and more efficiently without extra manpower or high costs.	- Customized safety alerts and health reports tailored to the unique daily routines and specific medical requirements of every elderly user. - Facilitate continuous improvement through integrated in-app tools and forums that allow families to provide immediate, honest evaluations of services.	- Elderly individuals (aged 60+) living alone or semi-independently - Family members responsible for monitoring elderly relatives - Nursing homes, assisted living facilities, and elderly care centers - Low- and middle-income households who need affordable alternatives
	Key Resources		Channels	
	Tangible: Hardware inventory, operational funds. Intangible: CareWatch software ecosystem, adaptive machine learning algorithm, layered data architecture, skilled tech and community management team, medical and regulatory advisory.		Mobile App Store: Distribute the app for easy access by families and caregivers Social Media Platforms: Raise awareness and promote CareWatch benefits Healthcare & Institutional Partnerships: Reach elderly users and build trust through hospitals and care centres E-commerce Platforms: Sell the device through convenient online platforms	
Cost Structure			Revenue Streams	
Research & Development (R&D) Costs for continuous refining of fall-detection algorithms and machine learning model training. Manufacturing & Hardware Procurement of IoT sensors, wearable components, and assembly costs for the "Core" and "Pro" devices. Marketing & Customer Acquisition Costs for social media advertising, partnership development with hospitals, and distribution through e-commerce platforms.			Product Sales: - A cheaper price for standard CareWatch Core than CareWatch Pro that offers premium materials. - Discounted hardware bundles for nursing homes and assisted living facilities Partnerships & Transaction Fees: - Revenue-sharing partnerships with health insurers who subsidize devices to reduce ER visit costs.
